Appendix A

Demographic Data

The demographic data in this report is compiled from several sources using a specialized process. Sources include annual population estimates and population projections from the US Census Bureau, birth and mortality rates from the US Health Department, and projected regional job growth. EMSI, Economic Modeling Inc.

Industry Data

(1) For QCEW Employees, EMSI primarily uses the QCEW (Quarterly Census of Employment and Wages), with supplemental estimates from County Business Patterns and Current Employment Statistics. (2) Non-QCEW employees data are based on a number of sources including QCEW, Current Employment Statistics, County Business Patterns, BEA State and Local Personal Income reports, the National Industry-Occupation Employment Matrix (NIOEM), the American Community Survey, and Railroad Retirement Board statistics. (3) Self-Employed and Extended Proprietor classes of worker data are primarily based on the American Community Survey, Nonemployer Statistics, and BEA State and Local Personal Income Reports. Projections for QCEW and Non-QCEW Employees are informed by NIOEM and long-term industry projections published by individual states. U.D. Department of Labor, Bureau of Labor Statistics, Bureau of Economic Analysis, Arizona Department of Administration. EMSI, Economic Modeling Inc.

State Data Sources

This report uses state data from the following agencies: Arizona Department of Administration, Office of Employment and Population Statistics. EMSI, Economic Modeling Inc.

Occupation Data

Wage estimates are based on Occupational Employment Statistics (QCEW and Non-QCEW Employees classes of worker) and the American Community Survey (Self-Employed and Extended Proprietors). Occupational wage estimates also affected by county-level EMSI earnings by industry. EMSI, Economic Modeling Inc. EMSI occupation employment data are based on final EMSI industry data and final EMSI staffing patterns.

Equifax Business-Level Data

Data for individual businesses is provided by Equifax (<http://www.equifax.com/commercial/>), which maintains a database of more than 20 million U.S. business entities. Note that in aggregate it will not be consistent with EMSI labor market data due to differences in definitions, methodology, coverage, and industry/geographic classification.

ZIP Code Data Disclaimer

Due to a lack of source data at the ZIP code level, EMSI's ZIP-level estimates can be less accurate when looking at a small number of ZIP codes. This is especially likely to occur in rural areas.

Item 3.1.3. Council proposed survey questionnaire

Town office received the document on 5/15/2015;
Council reviewed it at the 6/9/2015 study session
(document included in the 6/9/2015 meeting packet);
same document forwarded to YC REDC on 6/12/2015 for
future survey purposes.

Yvonne,

Please find the results of council input into the changes for the 2009 Dewey-Humboldt survey. Of the seven members of council, 4 responded with changes. In addition, there was input from the P&Z committee.

To indicate changes and for simplicity, I utilized the 2009 survey sheets and next to each line item and off to the side, I indicated the number of inputs that were not in favor of asking the question again, ie a -3 would indicate that 3 members did not want to ask that question again. No mark, would indicate that there was no objection to the 2009 question.

In addition, I have included other possible questions to be considered for addition to the survey. I have included these questions in their original form and without modification.

If you or staff has any further questions, please feel free to contact me.
